

## Future of Technology in Education 2010

01 October 2010 – a date for the diary

**London, 17<sup>th</sup> June 2010:** University of London Computer Centre (ULCC) today launched the website and announced the date for this year's Future of Technology in Education (FOTE) conference.

FOTE10 will be held on **01 October 2010** at the University of London's iconic art deco building, [Senate House](#), which has recently undergone major refurbishment and has been ULCC's new home since autumn last year.

First held in 2008, the annual FOTE conference quickly established itself as key event for academics and IT professionals alike by highlighting both new technologies and practical examples of how technology is impacting teaching and learning today. As Nick Skelton, IT Manager at Bristol University and speaker at FOTE09 remarked:

*"thanks again for #fote09. Think FOTE is well established now as one of the leading UK educational IT conferences" via [Twitter](#)*

FOTE10 will address core themes such as mobile applications, augmented reality, geolocation, podcasting and iPad/e-book readers. We have range of amazing speakers lined up to share their insight and thoughts with this year's delegates.

"With the advances seen with the Android platform over the last six months and the excitement surrounding the imminent launch of the iPhone 4, 2010 is already proving to be the year of the mobile. With this in mind, mobile is a core theme for FOTE10 and we are privileged to have a great selection of speakers who will help shed some light on how the recent rush of innovation within the mobile space will impact the academic sector. FOTE10 is going to be the best yet!" commented Tim Bush, Marketing Manager at ULCC.

FOTE10 is a **free one day** conference and due to high demand in the past we decided to offer a [pre-registration option](#). Once signed up you will be the first to know when tickets become available, a crucial advantage considering the **300** tickets for FOTE09 were all but history **six hours** after being released in August last year.

We look forward to welcome familiar faces and hopefully meet a few new ones at FOTE10.
